MEETING MINUTES

Product committee · Tailspin Toys

Date: October 14, 2026, from 10:00 to 11:00
Place: Triana room, Seville office
Attendees: Lucía Romero (product), Andrés Vega (web team), Marta Ibáñez (data) and Pablo Ortega (QA)

1. Status of sprint 14

The web team closes every task of the sprint. The end-to-end tests pass against the built site.

2. Game ratings

Several users can't tell half stars apart. The proposal is to replace them with a numeric score, which is easier to compare.

3. Database

The committee reviews whether to change the database. The catalog is small and loads from games.csv, so there is no need.

Decisions

D1. SQLite remains the database of the catalog.
D2. Game ratings are shown on a scale of 1 to 10, as whole numbers and without stars. Implemented in sprint 14.
D3. The "Support This Game" button still does not process contributions until the payment gateway is chosen.

Actions

- Lucía Romero: update the requirements specification (v1.3) with decision D2. Before 2026-10-30.
- Pablo Ortega: prepare the test plan of version 1.3. Before 2026-11-06.

Signed: Lucía Romero, secretary of the committee
