Docling warm-up document

This PDF is part of the extra prerequisites of the workshop *Build your Engineering Reviewer*. Converting it once at home downloads the models Docling needs, so you do not have to do it over the venue wifi.

Models it downloads

Model	What it does	Approx. size
Layout (heron)	Detects headings, paragraphs and tables	164 MB
TableFormer	Rebuilds the structure of tables	342 MB
RapidOCR	Reads text in scanned images	61 MB (bundled)

The next page is a scanned image. It checks that OCR works.

Test minutes (scanned page)

This page is an image, with no text layer.
Docling can only read it with OCR.

Control word: Giralda

If the warm-up finds it, OCR works.
